OVERVIEW

Use the Connector for Universal Print application to directly integrate your Konica Minolta MFP into Microsoft's cloud printing solution, Universal Print.

With this application you can perform cloud printing with ease.

This guide provides step-by-step instructions for how to configure Azure and the application.

Connector for
Universal Print icon

Environment requirements

The following Microsoft 365 environments (including Microsoft Entra ID) support Universal Print:

Compatible editions:

- Microsoft 365 Enterprise F3, E3, E5, A3, A5
- Windows 10/11 Enterprise E3, E5, A3, A5
- Microsoft 365 Business Premium

Client device (compatible with PIN protected printing):

- Windows 10 version 21H2 or later
- Windows 11 version 21H2 or later
- Mac OS 13.3 or later

Client device (not compatible with PIN protected printing):

- Windows 10 version 1903/1909/2004/20H2

Compatible models

Models equipped with IWS version 3.2.0 or higher

(The IWS version varies depending on the model's firmware version.)

PRECONFIGURING AZURE

The following settings on the Azure Portal are necessary for using Universal Print.

1. User Creation
2. Assignment of User Role
3. Assignment of Universal Print license
4. Enable Document Conversion

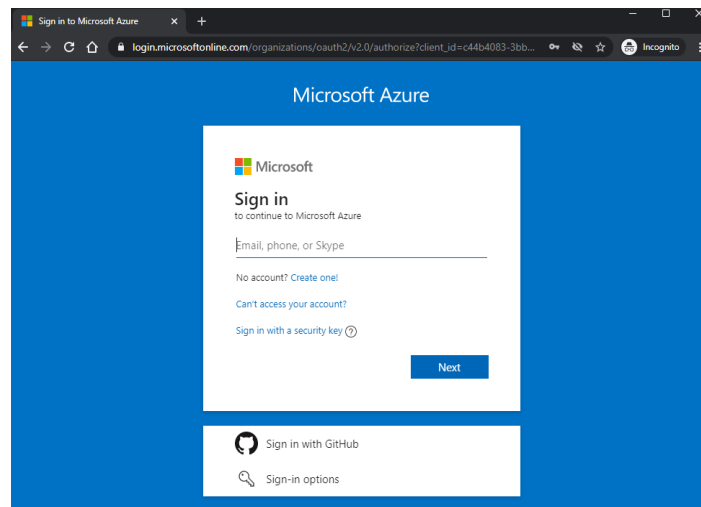

NOTE: If you are using an existing account that has the Azure Global Administrator role, please skip steps 1 and 2. Otherwise, if you are creating a new account, please start at Step 1.

NOTE: “Global Administrator” role is required for registering the first machine in order to accept the application “Connector for Universal Print”. From then on, users with the “Printer Administrator” role will be able to register the remaining machines.

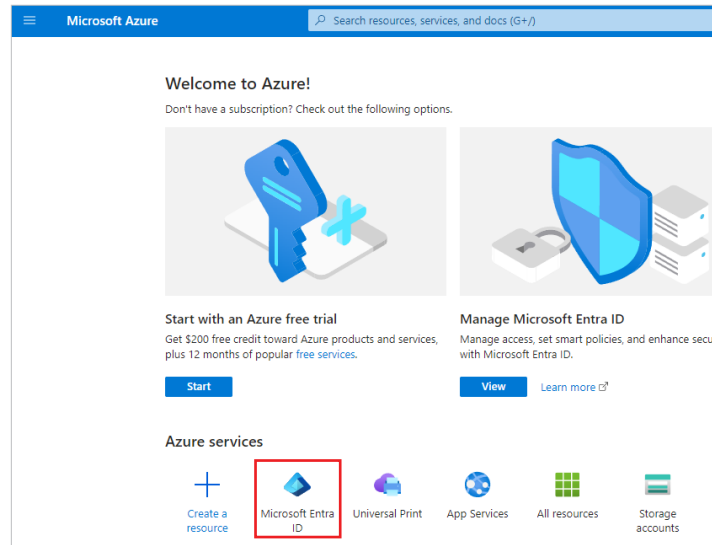

User Creation

In this section, you can register as a user to Microsoft Entra ID.

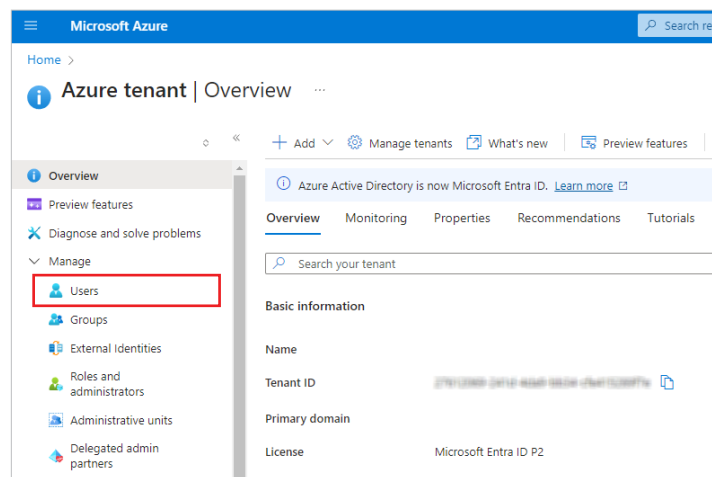

1. Log into the Azure Portal. (<https://portal.azure.com>)

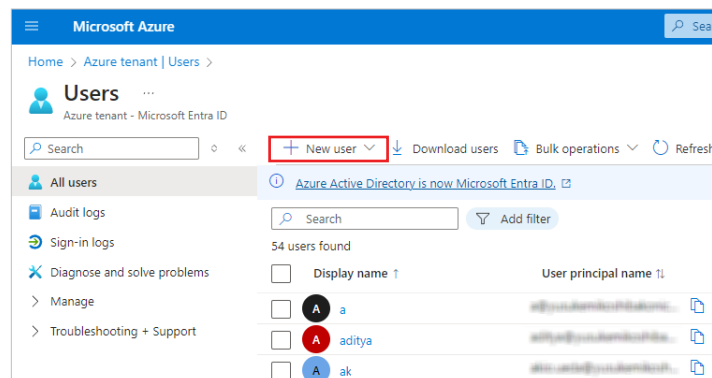

2. Select [Microsoft Entra ID].

3. Select [Users].

4. Select [New user].

5. Input the followings. And after that, tapping [Create].

Search resources, services, and docs (G+/I)

Assignment of User Role

In this section, you can set authorizations for users.

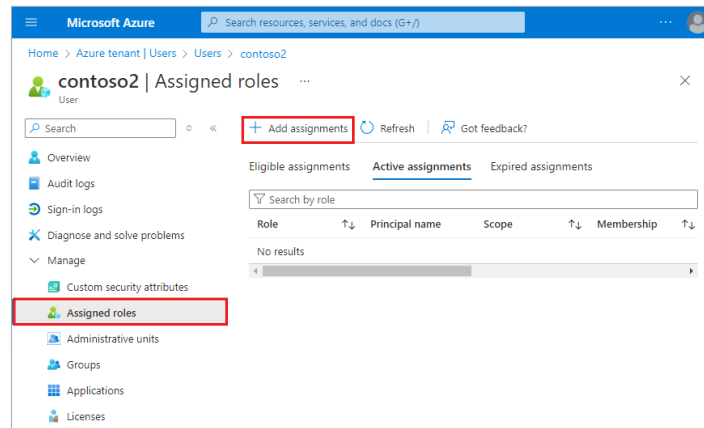

1. Select the created user.

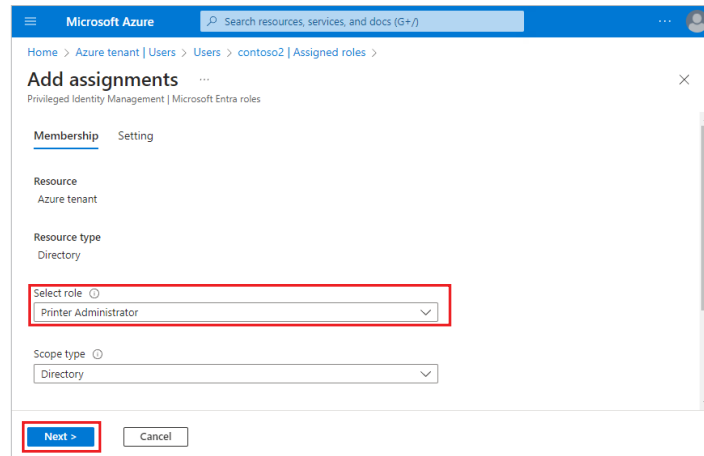

The screenshot shows the 'Users' page in the Microsoft Azure portal. The page has a blue header with the 'Microsoft Azure' logo and a search bar. Below the header, there's a navigation bar with 'Home > Azure tenant | Users >'. The main content area is titled 'Users' and shows a list of users. The list has columns for 'Display name', 'User principal name', and 'User type'. The users listed are 'a', 'aditya', 'ak', and 'b'. The 'User type' for all listed users is 'Member'. There are also search filters and a 'Display name' dropdown menu.

Display name	User principal name	User type
a	aditya.dharmas@contoso.onmicrosoft.com	Member
aditya	aditya@contoso.onmicrosoft.com	Member
ak	ak@contoso.onmicrosoft.com	Member
b	b@contoso.onmicrosoft.com	Member

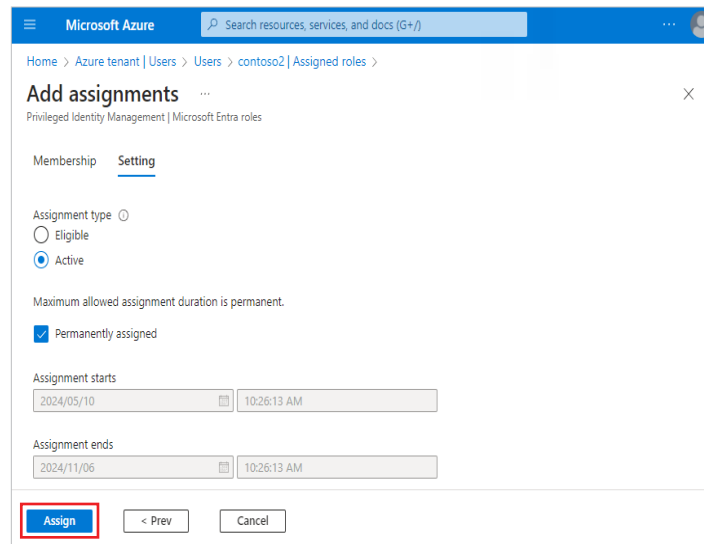

2. Select [Assigned Roles] and then [Add Assignments].

3. Select the Printer Administrator role, and then select [Next].

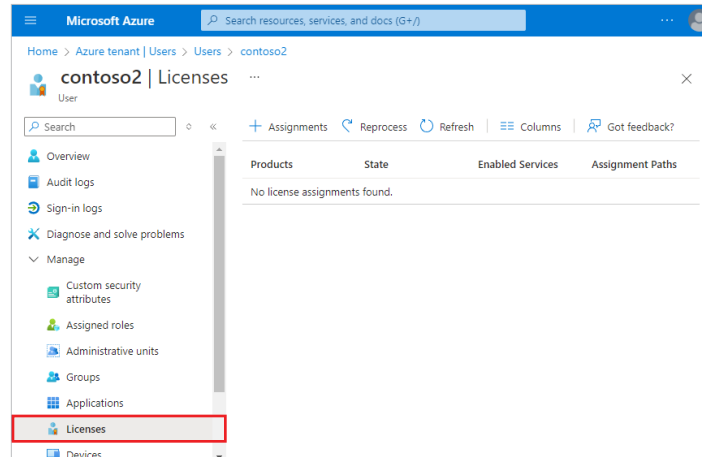

4. Select [Assign].

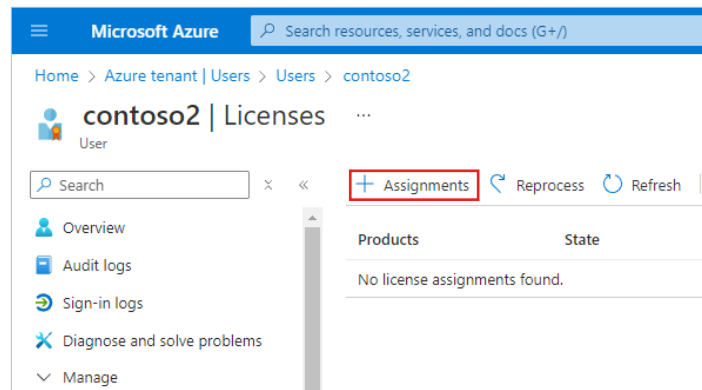

Assignment of Universal Print license

In this section, you can set the licenses for Universal Print.

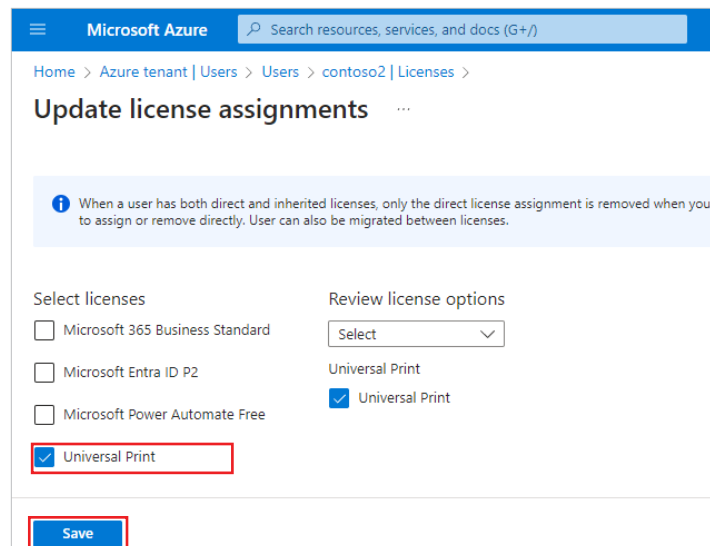

1. Select [Licenses] from the context menu of the user.

2. Select [Assignments].

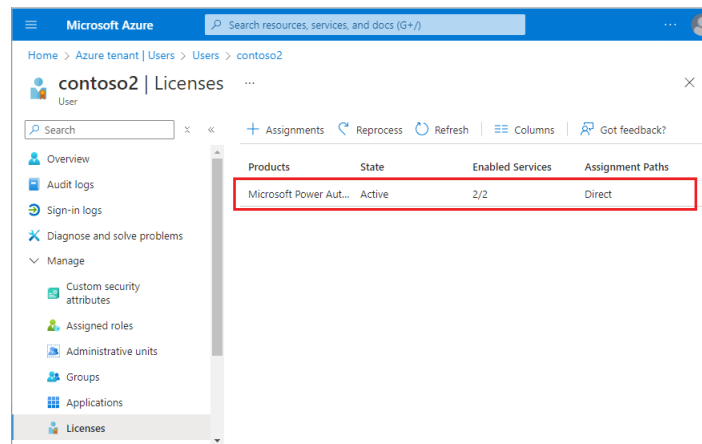

3. Select [Universal Print] from the "Select Licenses" category, and then select [Save].

NOTE: [Universal Print] on the right side will become checked automatically.

4. Confirm that the “Universal Print” license is assigned.

Enable Document Conversion

Universal Print offers automatic document conversion functionality to maximize print support for client devices in your organization.

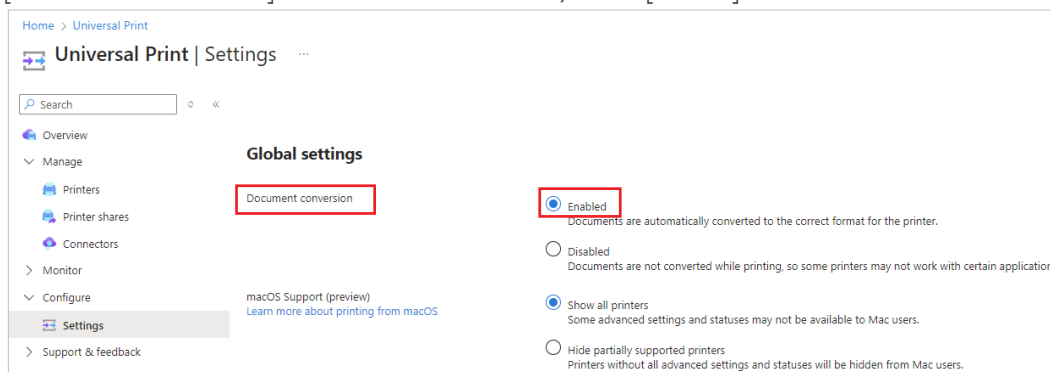

Some documents may fail to print unless they are parsed and converted to the printer supported format.

This setting should be enabled if Windows versions 1903 or 1909 are used within the organization.

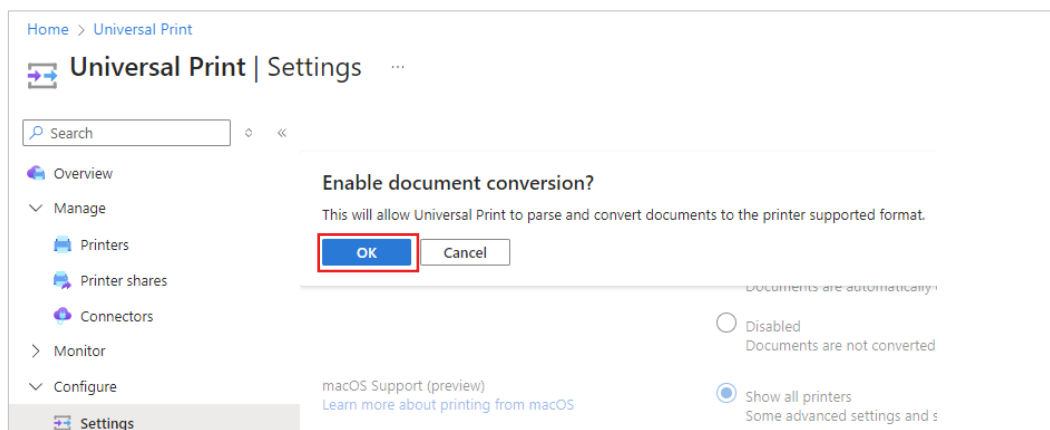

This setting is not required for Windows versions 2004 and later.

Link to Universal Print Portal: https://portal.azure.com/#view/Universal_Print/MainMenuBlade/~/Settings

1. Select [Document Conversion] from the menu and then, select [Enable].

2. Select [OK].

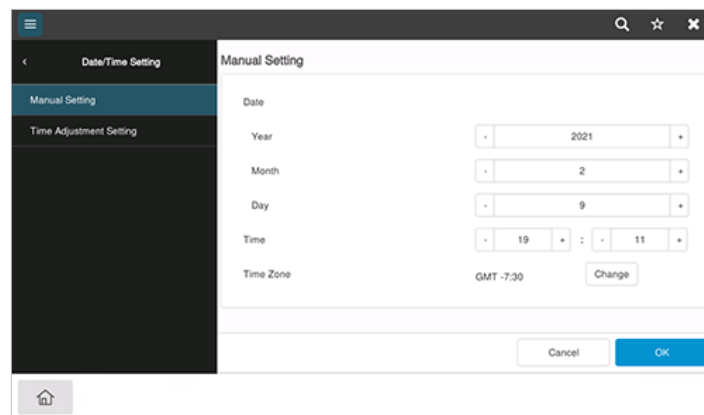

SETTINGS FOR LINKING WITH UNIVERSAL PRINT (FOR ADMINISTRATORS)

Printer Pre-Configuration

Date and time settings

Check that the current date and time of the printer are correctly configured.

1. Tap [Utility] on the home screen of the printer's Control Panel.
2. Tap [Administrator].
3. Enter the administrator password, and tap [OK].
4. Tap [Maintenance].
5. Tap [Date/Time Setting].
6. Tap [Manual Setting].
7. Check that the current date and time are correctly configured.

8. Tap [OK].

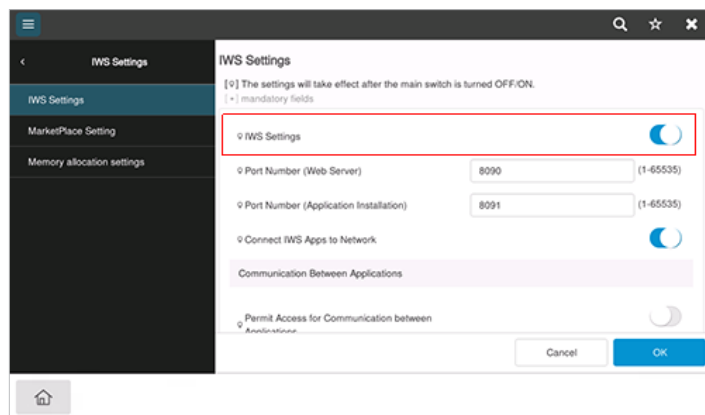

IWS settings

Enable the IWS function on the printer.

1. Tap [Utility] on the home screen of the printer's Control Panel.
2. Tap [Administrator].
3. Enter the administrator password, and tap [OK].
4. Tap [Network].
5. Tap [IWS Settings].
6. Tap [IWS Settings].

7. Turn ON the [IWS Settings].

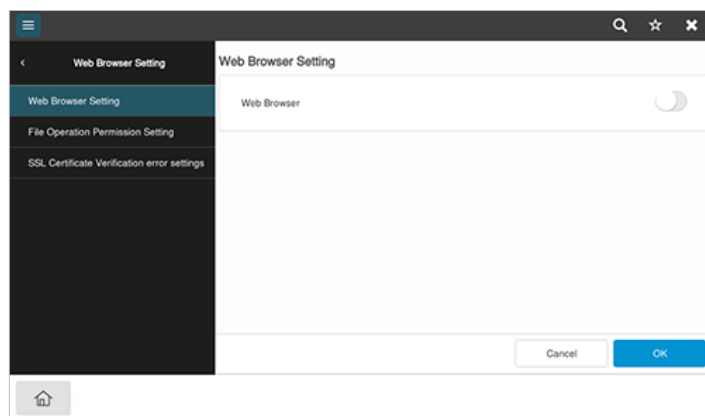

8. Tap [OK].

Setting up web browser

Enable the printer's web browser function.

1. Tap [Utility] on the home screen of the printer's Control Panel.
2. Tap [Administrator].
3. Enter the administrator password, and tap [OK].
4. Tap [Network].
5. Tap [Web Browser Setting].
6. Tap [Web Browser Setting].
7. Turn ON the [Web Browser].

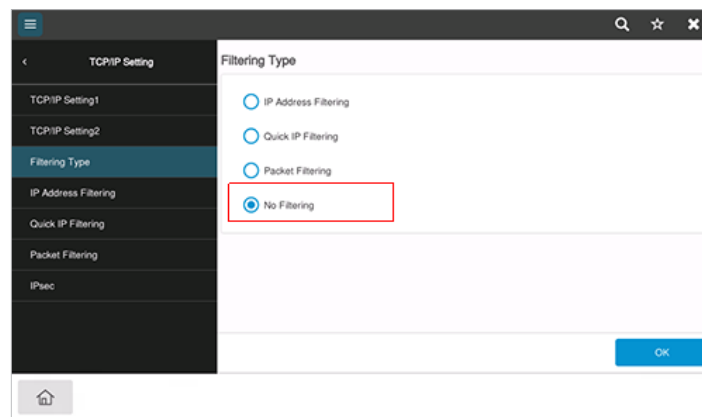

8. Tap [OK].

Canceling filter settings

Cancel the filter settings if the filter function is set up on the printer.

1. Tap [Utility] on the home screen of the printer's Control Panel.
2. Tap [Administrator].
3. Enter the administrator password, and tap [OK].
4. Tap [Network].
5. Tap [TCP/IP Setting].
6. Tap [Filtering Type].
7. Select [No Filtering].

8. Tap [OK].

Acquiring the Application

Procedure for acquiring from MarketPlace website

Access the MarketPlace website from the web browser of your PC, and buy this application.

1. Access the following MarketPlace website from the web browser of your PC, and log into your MarketPlace account.
 - <https://konicaminoltamarketplace.com/>
2. Click [Market] on the toolbar at the top.
3. Search for this application, and click [Learn More].
 - Search by using the keyword "Universal Print", or search from the category "Connectors".
4. Specify the required quantity and click [Buy Now].
The selected application will be added to the Shopping Cart.
5. Check the contents of the Shopping Cart and click [Continue].
6. Check the order details and click [Place Order].
This completes the acquisition of the application.
7. If you want to continue installing on the printer, click [View Apps & Licenses].
Proceed to the "Procedure for installing from MarketPlace website" ([page 11](#)).

Installing the Application

Procedure for installing from MarketPlace website

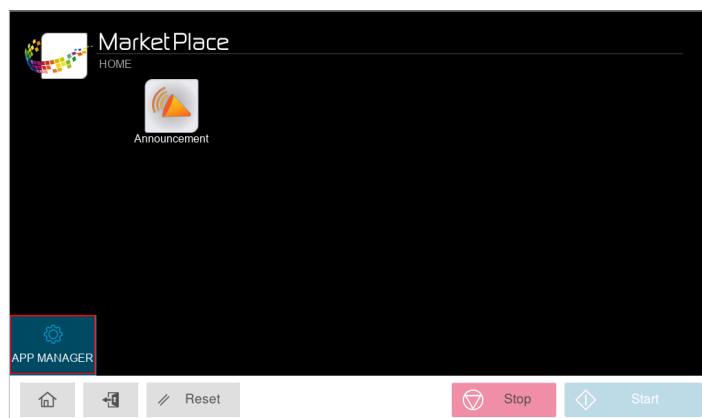

Connect to the printer via the MarketPlace website from the web browser of your PC, and install this application on the printer.

1. Access the following MarketPlace website from the web browser of your PC, and log into your MarketPlace account.
 - <https://konicaminoltamarketplace.com/>
2. Click [Apps & Licenses] on the toolbar at the top.
3. Select this application from the boxes on the left side of the page.
The printers for which you are the administrator will be displayed in the [Available] area.
4. Select the printer on which to install the application.
5. Click [Install].
This completes the installation of the application.

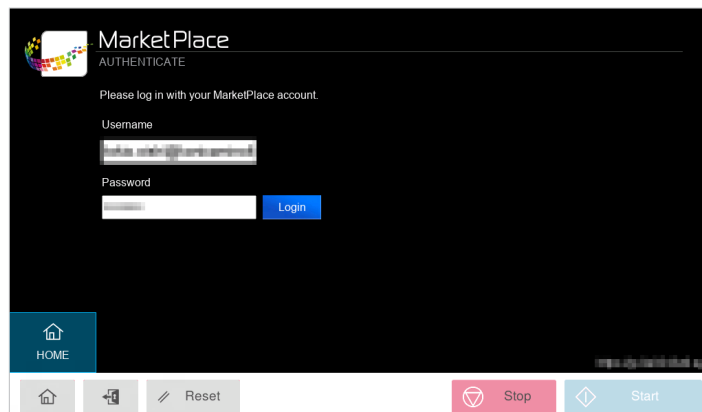

Procedure for installing from printer's control panel

Use the MarketPlace application from the printer's Control Panel to install this application on the printer.

1. Tap [MarketPlace] on the home screen from the printer's Control Panel.
2. Tap [APP MANAGER].

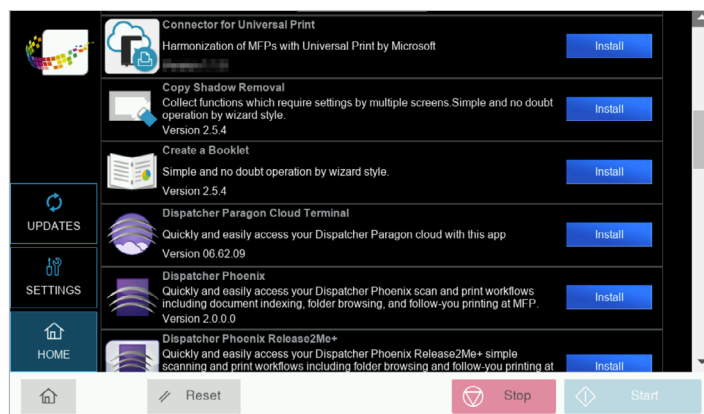

3. Log into your MarketPlace account.

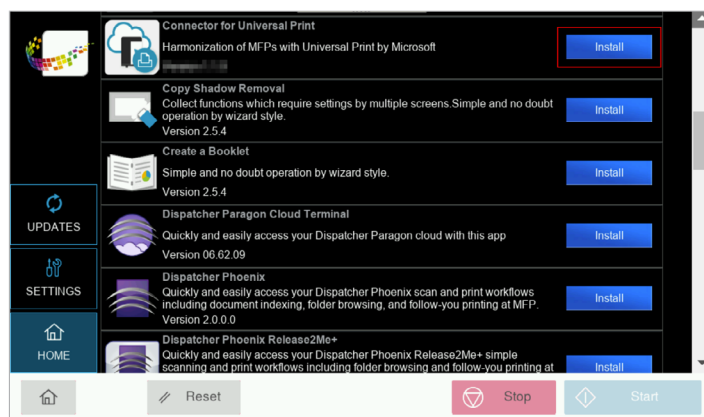

4. Tap [Purchased] to display this application.

5. Tap [Install].
This completes the installation of the application.

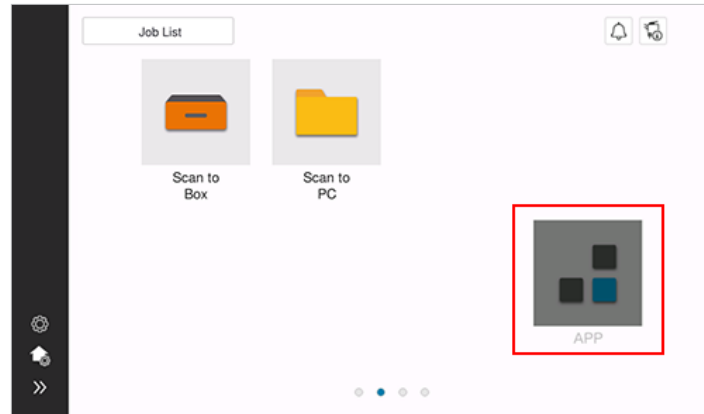

Registering the Printer with the Universal Print Service

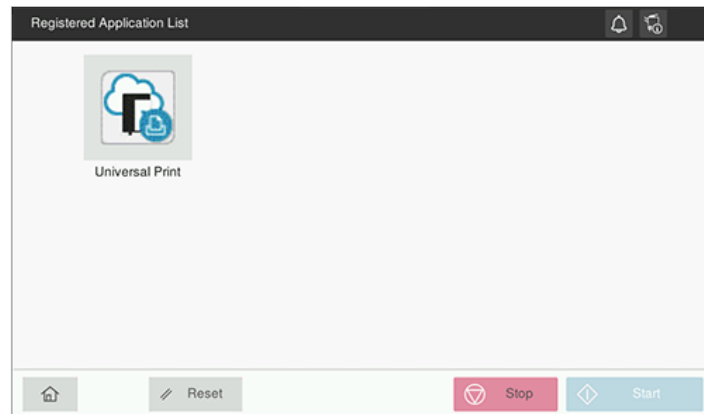

Printer registration

From this application, register the printer with the Universal Print service.

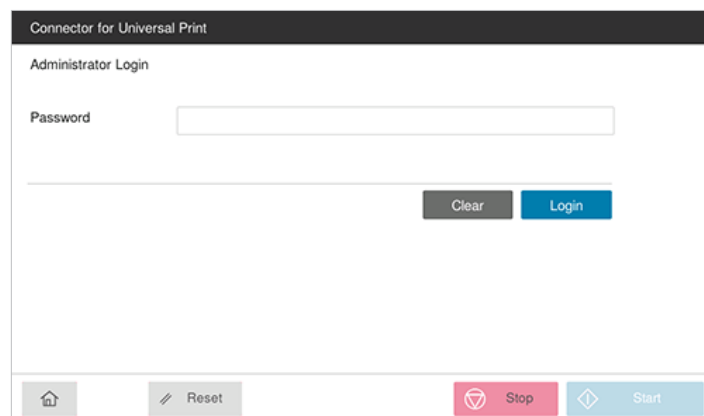

1. Tap [APP] on the home screen of the printer's Control Panel.

2. Tap the key for this application.

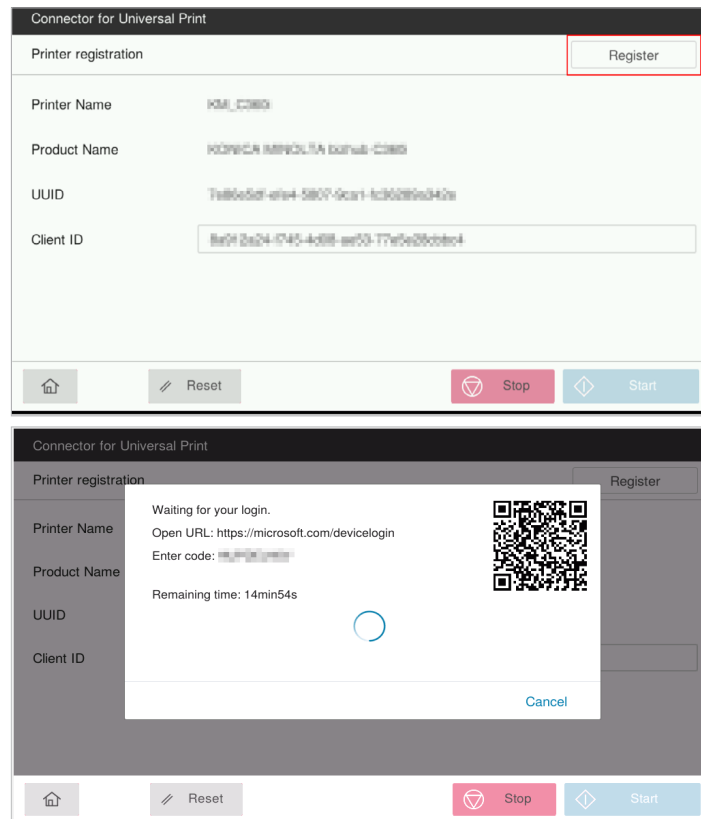

3. Enter the administrator password to login.

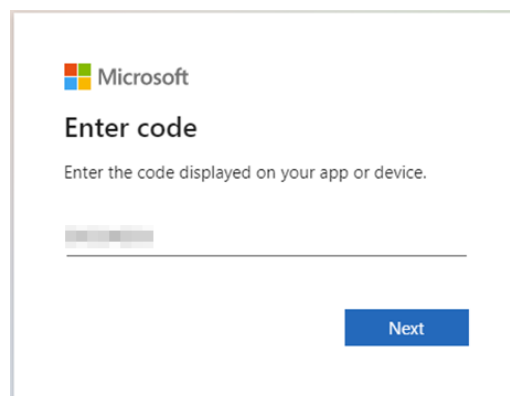

- After launching the Connector, you will see the printer registration screen.

NOTE: The Client ID is already filled out and does not need to be edited.
Tap the [Register].

- Access the following device authentication page from your PC or QR code.
 - <https://microsoft.com/devicelogin>
- Enter the sign-in code used for device authentication performed in Step 4.

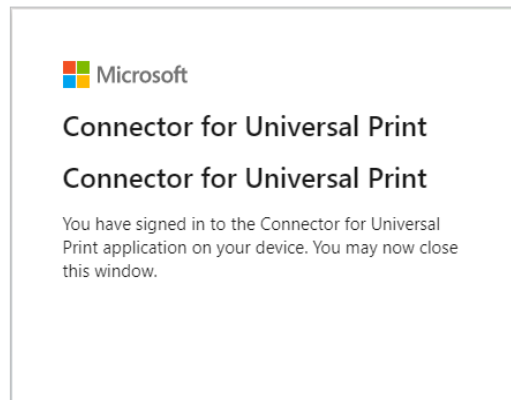

- Enter the details of/Select the Universal Print administrator account.

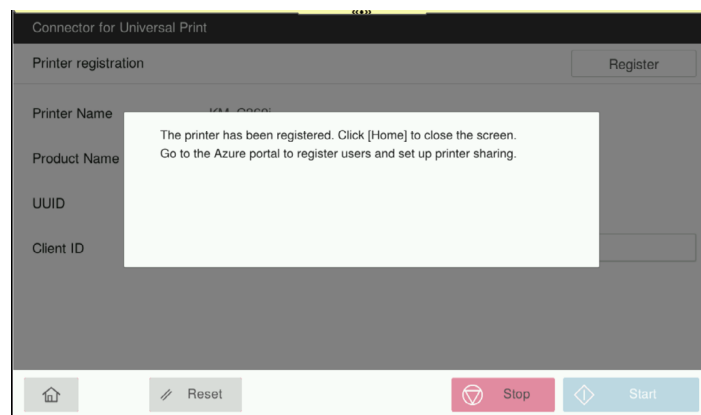

NOTE: For the first registration in a customer tenant, Global admin role is required.
Registration after the second device can be performed in the Printer admin role.

- Review the permissions and press [Accept].

9. Once the Sign-In Complete message appears, close the screen.

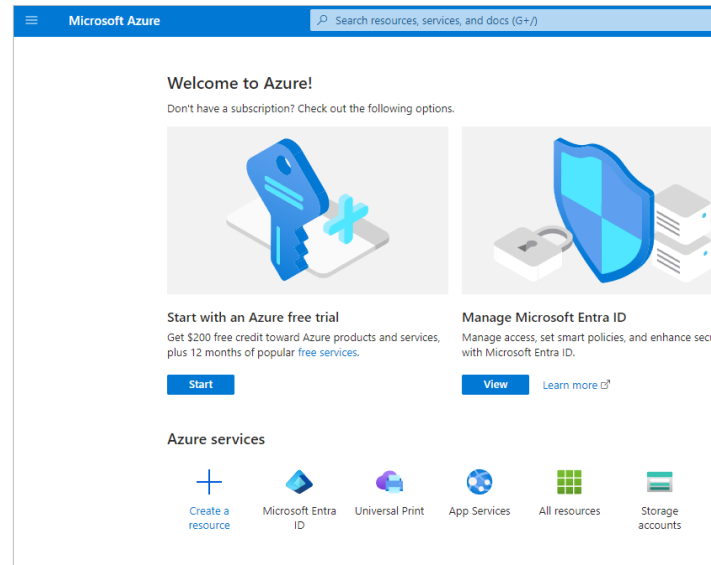

10. Check that the Registration Successful message is displayed on the printer's Control Panel, and tap [OK]. This completes the printer registration. Next, perform the printer sharing settings from the Azure portal.

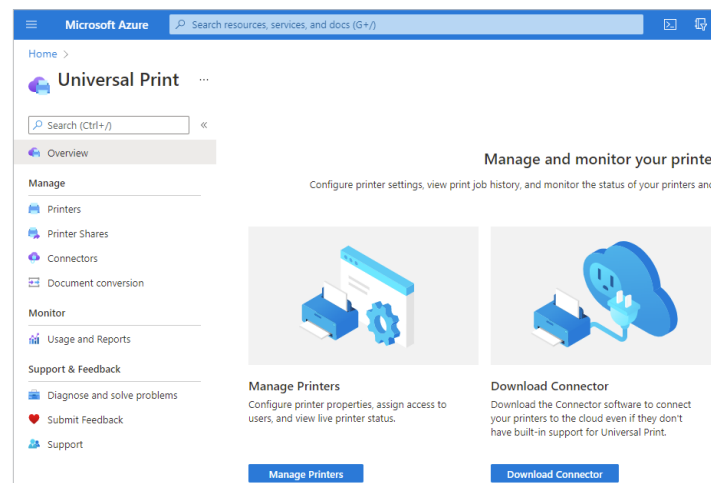

Printer sharing setup

Access the Azure portal from the web browser of your PC and set up printer sharing.

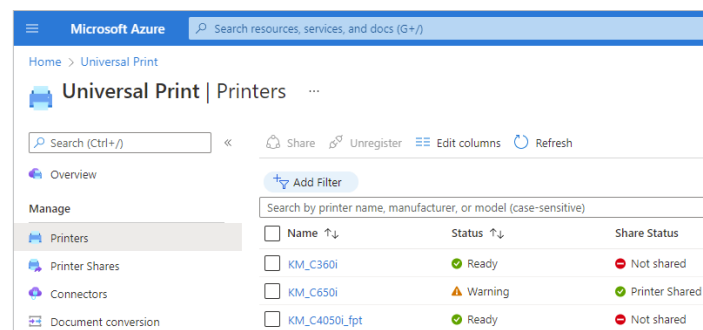

1. Access the Azure portal from the web browser of your PC and sign into the Universal Print administrator account.

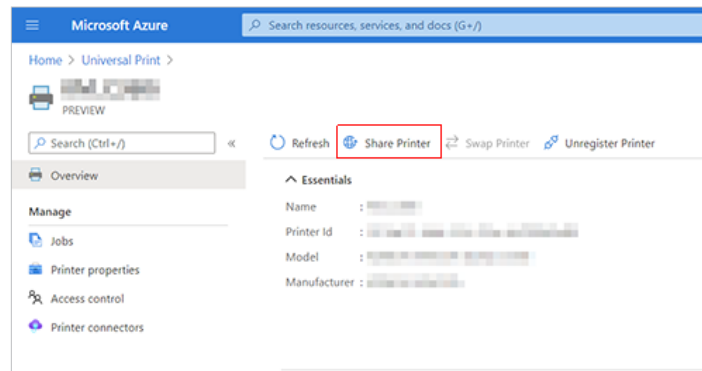

2. Open the Universal Print screen from Home.

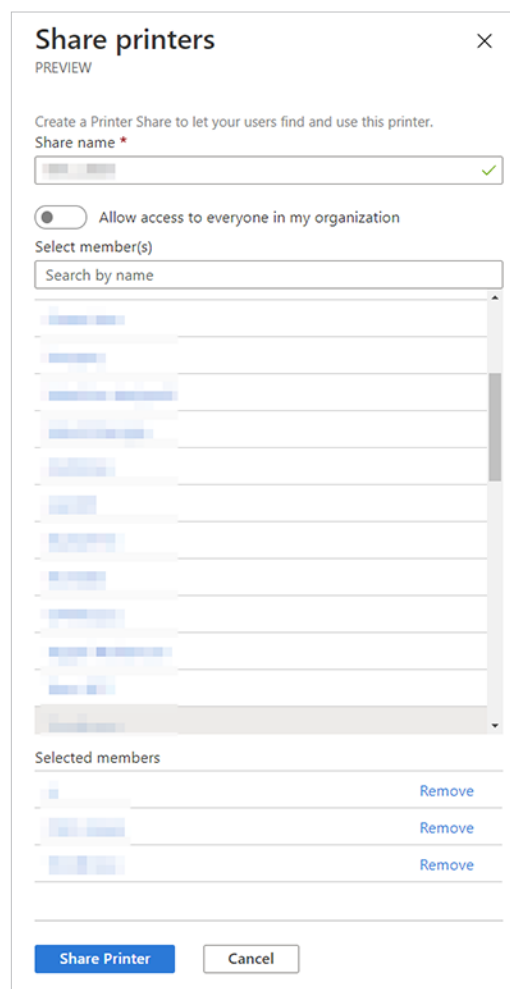

3. Click the registered printer.

- Click [Share Printer].

- Change the share name of the file if necessary. Specify the users to be allowed to access the printer.

A screenshot of the 'Share printers' dialog box in the Azure portal. The dialog has a title bar with 'Share printers' and a close button. Below the title bar, it says 'PREVIEW'. The main content area contains the following elements: a text prompt 'Create a Printer Share to let your users find and use this printer.', a 'Share name' input field with a red asterisk and a green checkmark, a toggle switch for 'Allow access to everyone in my organization' which is currently turned off, and a 'Select member(s)' section with a search bar labeled 'Search by name' and a list of user names. Below the list, there is a 'Selected members' section with three entries, each with a 'Remove' button. At the bottom of the dialog, there are two buttons: 'Share Printer' and 'Cancel'.

- Click [Share Printer].
This completes the printer sharing setup.

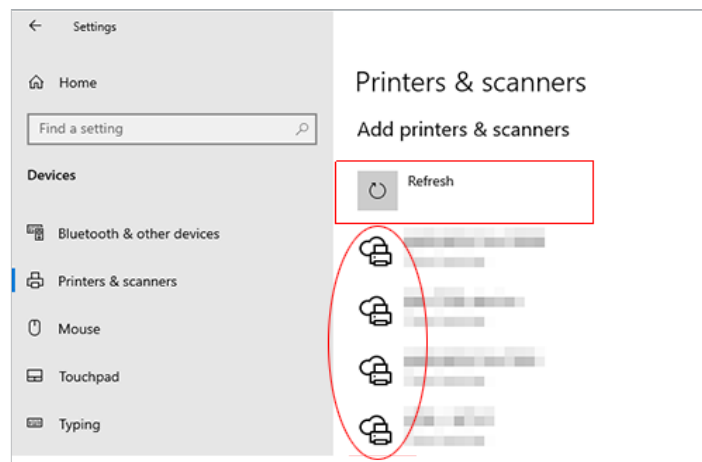

HOW TO PRINT

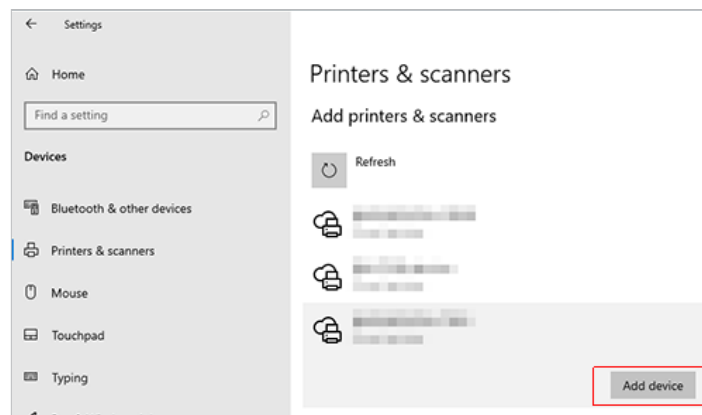

Adding a printer (Windows OS)

In order to print from your PC, add to your PC the printer registered with the Universal Print service.

- From your PC, sign into the account that has been allowed access to the printer.
- 1. Click [Settings] on the Start menu.
- 2. Click [Devices].
- 3. Click [Printers & scanners] from the menu displayed on the left side of the page.
- 4. Click [Add a printer or scanner] or [Refresh].
 - If you do not see the desired printer, search by clicking [The printer that I want isn't listed].

- 5. Select the printer (The share name set in Entra ID will be displayed.) from the list and click [Add device]. This completes the addition process of the printer.

Printing without PIN protected printing (Windows OS)

From your PC, specify the printer you added and execute printing.

1. Open the document data using the application software. From the [File] menu, select [Print].
2. Select the printer from the list of printers.
3. Change the print settings as necessary.
4. Execute printing.

Tips

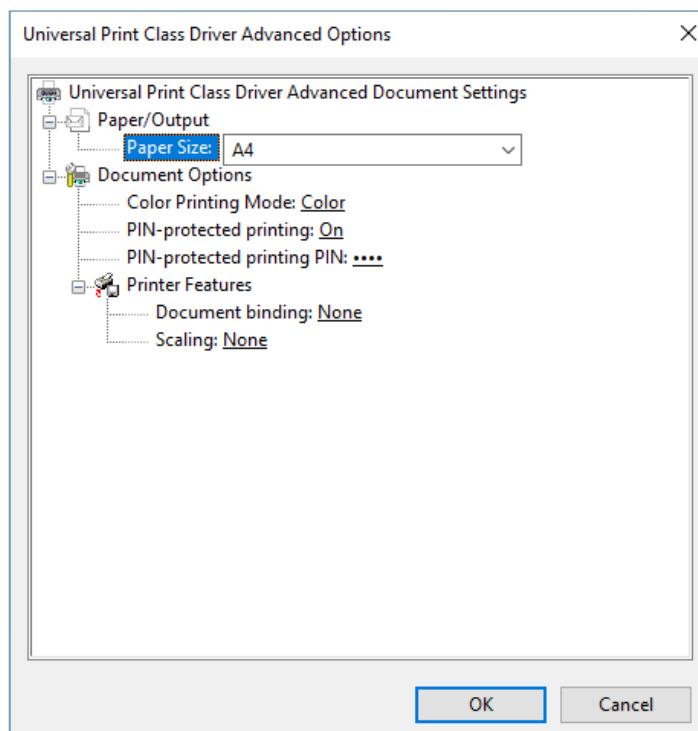

- A print job received by the printer via the Universal Print service will be executed as a print job of the public user.
- If user authentication/department management is available on the printer, enable [Print without Authentication] and [Public User Access].

Printing with PIN protected printing

Send print job from PC

From your PC, specify the printer you added and execute printing.

1. Open the document data using the application software. From the [File] menu, select [Print].
2. Select the printer from the list of printers, click [Preferences].
3. Click [Advanced], change [PIN-protected printing] to [On] on the Universal Print Class Driver Advanced Options, enter the PIN in [PIN-protected printing PIN], and click [OK].

NOTE: Only 4 to 15-digit number can be entered for the PIN.

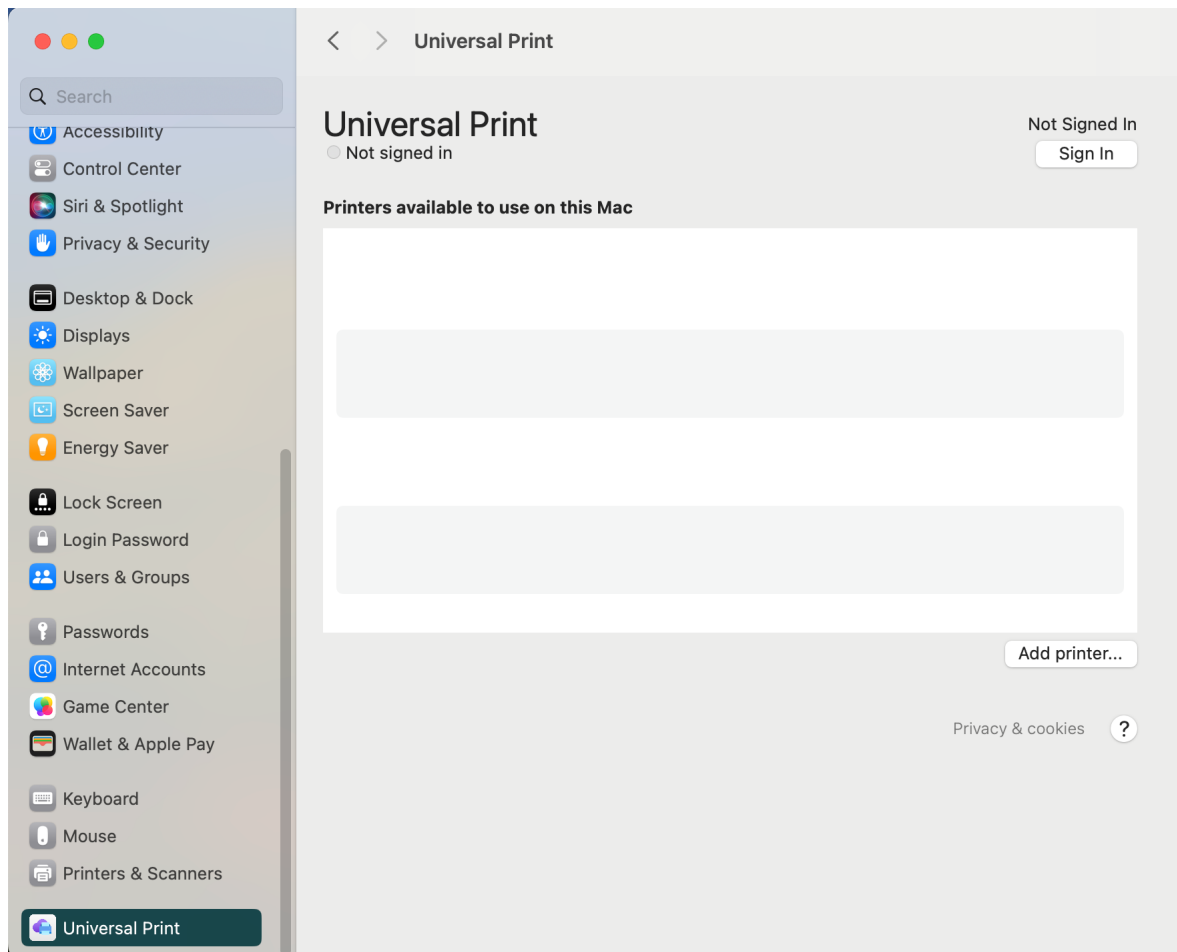

4. Click [OK] to execute printing.

Setting up Universal Print in Mac OS

To print from your PC, add the Universal Print application to your PC.

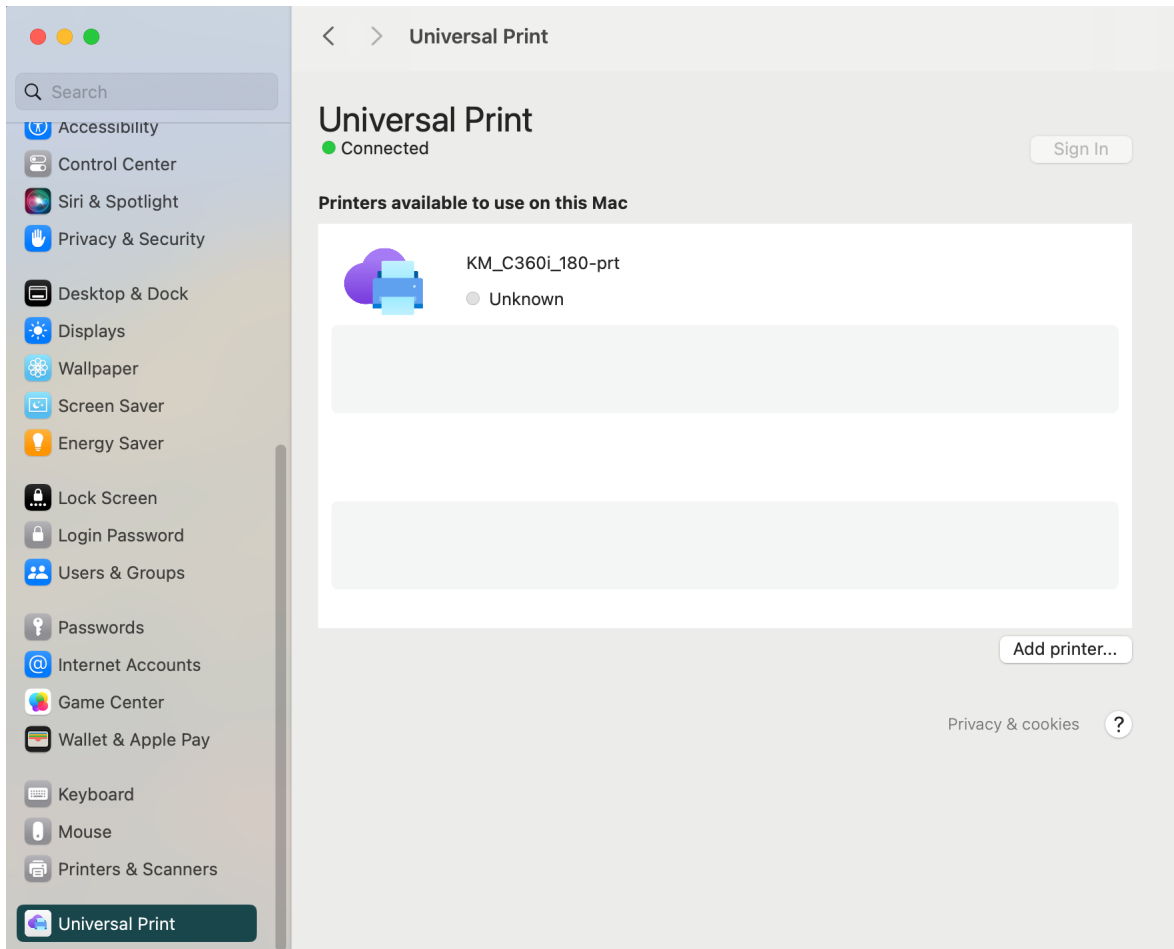

- Sign in to your PC with the account which has been permitted to access the printer.
- 1. Install the Universal Print application from Mac App Store.
- 2. Click Dock or the Apple logo -> [System Settings] to open [System Settings].
- 3. Go to [Universal Print] in the left navigation menu.

4. Sign in with the Microsoft Entra ID account.
5. Click [Add printer].
6. Select the target printer (the shared name specified with Entra ID is displayed) from the list, and click [Add printer].

This completes the addition process of the printer.

Printing from PC (Mac OS)

From your PC, specify the added printer to execute printing.

1. From any application that supports printing, click [Print].
2. Select the printer from the list of printers.
3. When printing with the PIN, change [PIN-protected printing] to [On] from the Security of the print job, and enter the PIN.

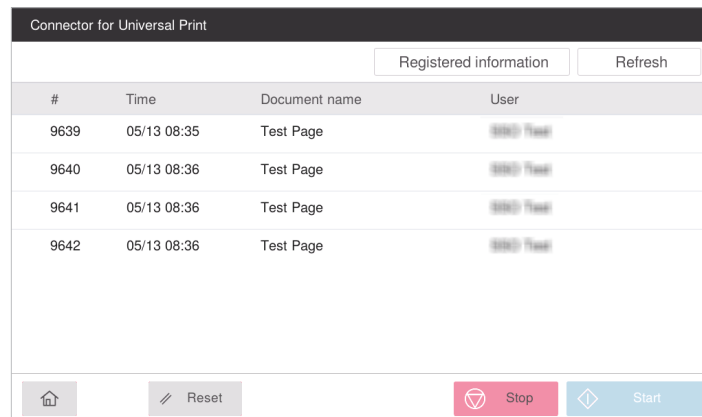

The screenshot shows a Mac OS print dialog box. At the top, the 'Printer' is set to 'KM_C360i_180-prt' and 'Presets' are set to 'Default Settings'. Below this, the 'Scaling' is set to '100%'. A section for 'Safari' shows 'Print backgrounds' as unchecked and 'Print headers and footers' as checked. Further down, there are expandable sections for 'Media & Quality' (Feed: Auto Select, Media Type: Auto Select, Quality: Normal), 'Layout' (1 page per sheet), 'Paper Handling' (Collate Sheets, All Sheets), 'Print Job Security', and 'Watermark' (Off). The 'Print Job Security' section is expanded, showing 'Print with PIN' as '1234' with a toggle switch turned on. At the bottom left, there is a help icon and a 'PDF' dropdown menu. At the bottom right, there are 'Cancel' and 'Print' buttons.

4. Click [Print] to execute printing.

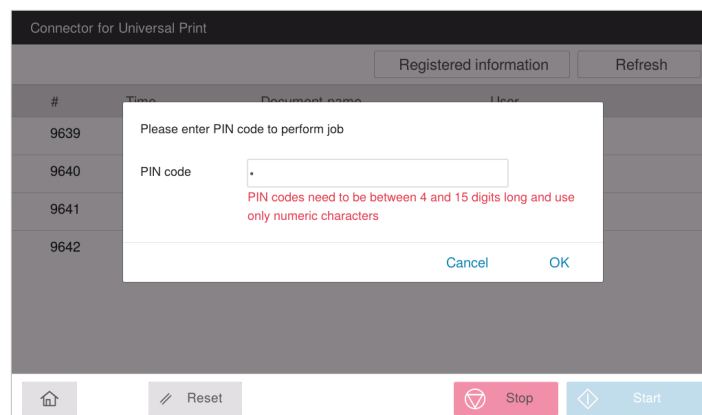

Printing from MFP

From this application, execute printing with the Universal Print service.

1. Tap [APP] on the home screen of the printer's Control Panel.
2. Tap the key for this application.
3. Select the job.

4. If the PIN has been set, enter the PIN code, and tap [OK].

5. The job is executed.

Tips

- A print job received by the printer via the Universal Print service will be executed as a print job of the public user.
- If user authentication/department management is available on the printer, enable [Print without Authentication] and [Public User Access].

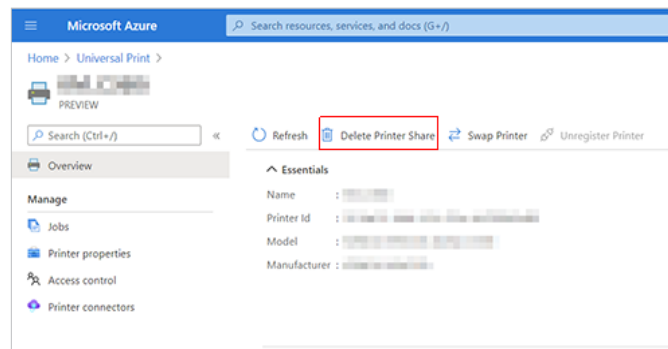

OTHER OPERATIONS (FOR ADMINISTRATIONS)

Deleting the Registered Printer from the Universal Print Service

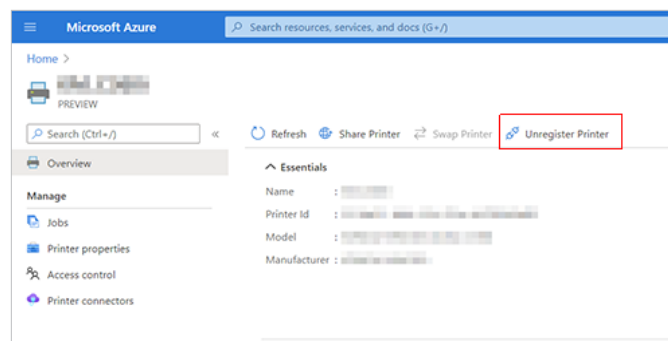

Deleting from Azure portal

Access the Azure portal from the web browser of your PC and delete the registered printer. This will also delete the printer information registered in this application.

1. Access the Azure portal from the web browser of your PC and sign into the Universal Print administrator account.
2. Open the Universal Print screen from Home.
3. Click the printer to be deleted.
4. Click [Delete Printer Share].
Printer sharing will be deleted, and the option [Unregister Printer] will be activated.

5. Click [Unregister Printer].
This completes the process of printer deletion.
